

How Can You Help Protect Our Animals?

With just doing at least one of these things on this list will help an animal out!

1. Make your home a friendly environment for all animals
2. Don't use harsh chemicals on your yard, like pesticides
3. Slow down when you are driving especially at night
4. Don't purchase products that were made from animals
5. Don't purchase products that are animal tested
6. Avoid using plastic bags, use reusable bags
7. Instead of putting food in sandwich bags use reusable containers
8. If you have litter do not throw it on the ground put it in the garbage

Agencies to Contact To Help Out Our Animals

Protect Your Animals:

Protect Our Animals From:

Poaching

Abuse

Endangerment

Poaching Needs To Be Stopped

Poaching is a crime that results in death against wildlife. Those adult animals that are poached, may have young ones, and those young ones are left orphaned and starved. Very few poachers are caught or punished, this is wrong.

Poaching needs to be stopped because someone is killing an animal illegally.

This is murder, and people who murder other people go to jail, but for those that murder animals illegally don't get caught or punished for what they have done how is that right? Some poachers just love killing animals and once they kill an animal it is considered a "trophy". Poachers are also doing this because of the profit that they will make, for example; a big-horned sheep antlers can be worth \$20,000 on the black market.

Animal Cruelty is a Crime

The number of animal cruelty cases that have been recorded is just a pinch of what is really happening out there, most cases don't even get recorded. Violent Crimes against people are different from animal abuse because animal cases are not produced by the government, which makes it hard to see how common the cases are. But, we can use the information given to us to prevent more cases coming up. Did you know that the most common victims of animal abuse are either dogs (70.1 %), cats (20.9%) or other animals like horses and livestock (24.1%). We have found out that most of the people who abuse their children or spouse will abuse their animal as well. This needs to stop they are your loyal pet and your hurting them!

Why?

Saving Our Endangered Animals

The term "Endangered Species" means that these animals are being under a threat of global extinction.

The rate right now for extinction is thought to be far greater than the expected rate, with many types of animals going extinct before they have even been discovered. The rate of the decline in the species should concern us all. They don't just add beauty and uniqueness to the world, they are very important to our global economy. The species maintain our ecosystems by helping keep our climate regular by providing things like: clean air and water, food, medicines, and fertile soils. So to protect our animals you can do some of these things: recycle, don't harass wildlife, and make your home a home for animals.
