

# PROTECT OUR ANIMALS

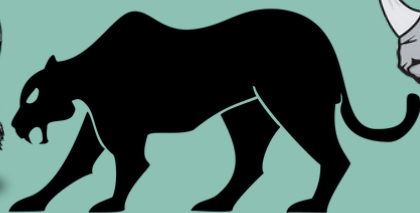

Protecting our animals is a major, because no one, neither person or animal should be put in pain, we all have a right to live without pain, and animals are no exception to that.

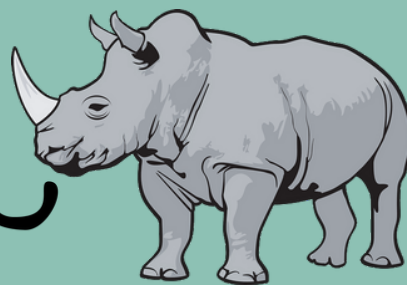

## HOW MANY ANIMALS OF THEIR KIND ARE LEFT

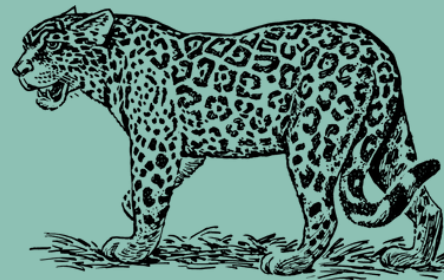

470,000

80

60

40

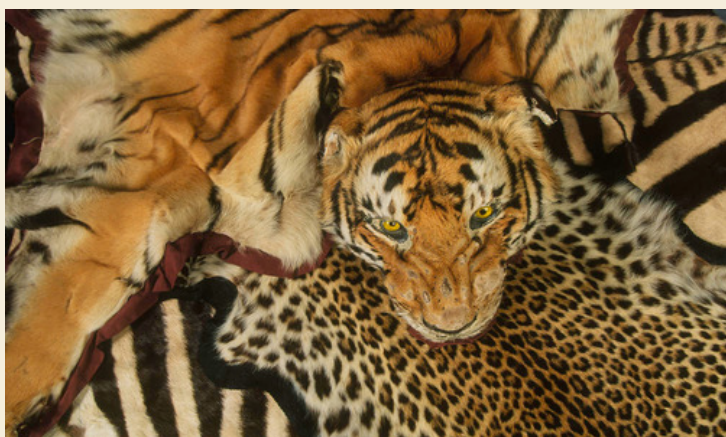

## THE DISGUSTING TRUTH

As years go on there are more illegal dog fighting going on, as there are 10,000 dogs that will die in one year. This is animal abuse.

Dog fighting is a blood sport and is inhumane, as these dogs are bred and trained to fight other dogs for entertainment and profit. These events can go on for about 2 hours, and it ends with one of the dogs not being able to continue.

## HOW TO HELP THE ENDANGERED ANIMALS GET THEIR HOMES BACK

Most endangered animals have lost their homes because of us, and we need to help the animals get their homes back. We can help by making the S.A.R.A stronger, by saying that you can not build anything in a certain distance of homes of the endangered species

## POACHING IS MURDER

Poaching is the same thing as murder in the "people" realm. You are taking an animals life away from them, illegally, and with that poaching has become all about the money that these people make. People can make \$70-\$213 billion, selling parts of unique animals.

## BUT THANK YOU TO THOSE WHO HELP

Even though animals are still being abused, poached and endangered. There are amazing people out there that love animals as much as we do and I commend those who help support these wonderful animals, and help them in any way that they can! So **THANK YOU!!**

Thank You
